

Using your phone as a modem  
Getting started guide

Together is better **O<sub>2</sub>**

Did you know that you can use some Sony Ericsson phones as modems to connect with O2 Broadband?

### Setting up is easy. You will need:

Mobile phone

USB Cable

Software

PC/Laptop

### Follow a few simple steps.

1. Install the PC Suite software onto your computer. You can download this from [sonyericsson.com](http://sonyericsson.com) or you may have received a disc with your phone.
2. Run the PC Suite software on your computer and connect your mobile phone with the USB cable.
3. Select 'Phone mode' for the USB Mode on your phone.
4. Your computer will now install the drivers that are necessary.
5. Once the drivers are installed you are now connected in 'Phone mode'.
6. On your computer, under the tools menu, just select 'Internet Connection' from the PC Suite menu displayed.
7. Then Select O2 IRL from the panel. Follow a few simple set up buttons and your mobile phone will connect to the Internet.

You can now browse the Internet with O2 Broadband using your Sony Ericsson as a modem.

Visit [o2.ie/broadband](http://o2.ie/broadband) to see if your phone is also a modem.

You can download Sony Ericsson PC Suite software from [sonyericsson.com](http://sonyericsson.com) or a software disc may have been supplied with your phone.

Did you know that you can use some Nokia phones as modems to connect with O2 Broadband?

### Setting up is easy. You will need:

Mobile phone

USB Cable

Software

PC/Laptop

### Follow a few simple steps.

1. Install the PC Suite software onto your computer. You can download this from [nokia.com](http://nokia.com) or you may have received a disc with your phone.
2. Connect your Nokia using your USB cable.
3. Select 'PC Suite' on your mobile phone screen.
4. Check for a mobile phone connection and on your computer, double click on 'PC Suite'.
5. When the 'PC Suite' window opens, double click on the 'connect to the internet' icon.

You can now browse the Internet with O2 Broadband using your Nokia as a modem.

Did you know that you can use your iPhone (3G & 3Gs) as a modem to connect with O2 Broadband?

### Setting up is easy. You will need:

Mobile phone

USB Cable

Mac/PC/Laptop

iTunes software

### Follow a few simple steps.

Using iTunes you can upgrade your phone to include Internet Tethering – This is a feature which allows you connect with O2 Broadband.

1. Connect your iPhone to your computer with a USB cable.
2. Upgrade iTunes to the latest version.
3. On your iPhone go to: Settings > General > Network > Internet Tethering
4. Just slide to 'on' position and when you are connected you will see a blue band at the top of the screen.

You can now browse the Internet with O2 Broadband using your iPhone as a modem.
